

ESSENTIALS OF HAZARDOUS MATERIALS MANAGEMENT (EHMM) COURSE

“EHMM Night School”

11 Week Course

September 11 – November 20, 2024
Wednesdays from 6:00 - 9:00 PM EDT/EST

For the past several years, AHMP has hosted a virtual Essentials of Hazardous Materials Management course in the Fall. This will be presented (live) via the Zoom Platform with ability to interact with the instructors and fellow students. The course consists of topics divided into 11-3 hr segments which helps students to have less overload and more fully absorb the materials.

The EHMM training curriculum aligns directly with the new AHMP Desk Reference (vs. 4) and a complimentary electronic copy of the Desk Reference is included with your EHMM course registration.

We are offering an optional quiz link after you've completed the course. These questions are designed to help you identify the (post EHMM course) topics in which you're competent and those for which you may need additional study prior to taking the CHMM exam.

The course will be taught by several trainers who are subject matter experts and have vast knowledge about the topics they will be teaching. With a variety of trainers, it should keep the course lively and interesting.

While not specifically a pre-exam preparatory course, it is certainly a great way to prepare in advance of the CHMM or CHMP exam. For those who already hold certification to the CHMM, PE, PG or other credential, this course is a great way to stay current with your career field and get 2.4 CEUs in a short period of time. If you've not been in the environmental field very long – this is a great way to get an overview of those areas in which you aren't currently experienced. There is no required test at the end of this course so it's low stress.

If you're unsure if this is a suitable course for you, please contact our EHMM course facilitator, Jennifer Koenig at (812) 945-1541 or jennifer@ecshelp.com.

COST

\$725 per person (AHMP Member)
\$925 per person (Non-Member)
