

KCHMM Presents
DOT Hazardous Materials
8-hr Advanced Update Course
Friday, March 21, 2025
8:30 AM – 5:00 PM
University of Louisville
Shelby-Hurst Campus

By request from the KCHMM membership, KCHMM is teaming with Environmental Compliance Source LLC to bring you an informative and economical DOT HazMat Shipper Update Course. Jennifer James Koenig and Corinne Greenberg, fellow CHMMs, will be your co-instructors for the day.

This is an 8-hr course designed to meet the recurrent training requirements in 49 CFR 172.704. This course will be targeted to professionals whose job is directly related to the shipment of hazardous materials and/or training of such individuals. This is an advanced course targeted for those requiring recurrent training and will review the basics as well as discuss recent DOT changes in regulations. While we will not reject any students who have never had the DOT HazMat course before, this will be a very challenging venue in which to learn brand new material at the advanced level. So, beware of bringing brand new hazmat employees to this course. ECS does offer entry level and HazMat shipper specific courses in a separate venue.

This course is designed for the advanced HazMat Employer or Employee and ideally suited to those with duties as in-house trainer. This course will not only prepare students for their hands-on duties as a HazMat employee but also with the reference tools and resources to train, verify new shipping requirements and more. Course materials include the Hazardous Materials, Substances & Wastes Compliance Guide (with Emergency Response Guidebook). Practice/exercises will be conducted and a written test given at the end. A verbal test is also available upon advanced request. Please note that some of these materials are in small fonts so bring your reading glasses if you need them!

Modal-specific information is targeted primarily for highway transportation. Some rail information will also be reviewed. Please note that modal transport via air and ocean vessel will NOT be covered in this course other than general information as it relates to the Hazardous Materials Table.

About your trainers:

Jennifer James Koenig, CHMM, has been teaching DOT HAZMAT for 28 years and has a unique way of conveying difficult training materials as well as offering suggestions on training techniques for you to use within your own organizations. Jennifer is the managing partner for ECS Audit and Compliance Services, a woman-owned business based in the Louisville area.

Corinne M. Greenberg, CHMM, is the Environmental Manager and internal hazmat trainer at Carbide Industries, a chemical manufacturer in Louisville's "Rubbertown" district, and this year is her 30th as a CHMM(!). With a professional background in manufacturing and certifying hazardous materials packagings, she has been teaching DOT HazMat training to all levels of HazMat Employees since receiving the training herself directly from U.S. DOT back in 1994 when they rolled out the (then) "new" "HM-181" and "HM-215" regulations.

Course Date and Time:

Where: University of Louisville Shelby-Hurstbourne Campus
